

I just want to say that I am happy to be an XM subscriber. I love the fact that XM offers traffic and weather reports and the service that XM provides is invaluable.

I get the opportunity and chance to listen to songs that I don't hear on regular radio stations anymore. The variety that XM offers is awesome.

I pay for the service of XM and feel that the NAB's petition should be rejected. I fully support the fact that XM has the ability to provide me with that kind of service that I want and need.
